About Mindshare Labs

We love designing websites and making awesome software. And because we love WordPress so much, we spend our free time (when we can get any) writing plugins and themes.

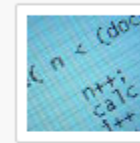

We hope you'll like them too.

 [Browse Products and Downloads](#)

Why Mindshare?

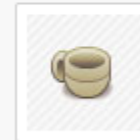

Because **we're developers too**. After growing increasingly frustrated with poorly written, poorly documented, and poorly supported code, we decided that if you want something done right you just have to do it yourself.

The plugins and themes you will find on this site have all been developed and tested in the real world. Once we're satisfied that the project meets our strict quality standards, we box it up and present it to you.

How we do it

Learn about our commitment to quality, and about what sets Mindshare software apart.

Share the love

If we've made your life a little easier, consider [donating a beer](#) to one of our enterprising developers.
